

LED Mini Profile

LED Mini Profile

LED spacing: 16 mm
Operating voltage: 12 volts DC, Power: 6.5 watts/metre

Description:

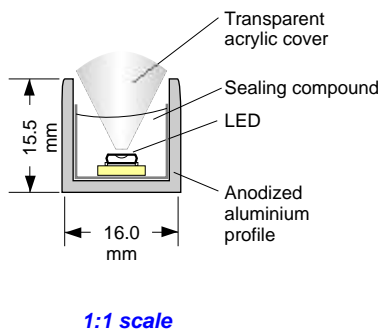

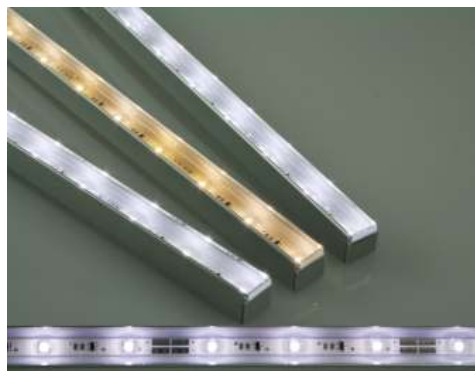

The LED mini profile consists of a u-shaped aluminium profile with a coloured acrylic glass cover. The cover can be removed and is available in various colours.

The circuit board and LEDs are embedded in transparent artificial resin making the profile suitable for outdoor installation.

Maximum available length: 2,000 mm

Designation	Article no.
LED Mini Profile	5 5000 034

LED Mini Profile With Power LEDs

LED spacing: 30 mm
Operating voltage: 12 volts DC, Power: 13.2 watts/metre

Description:

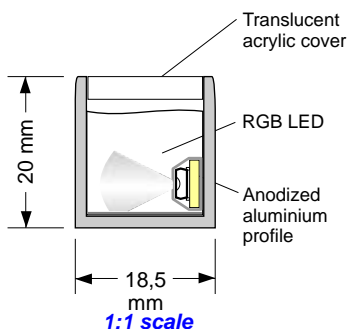

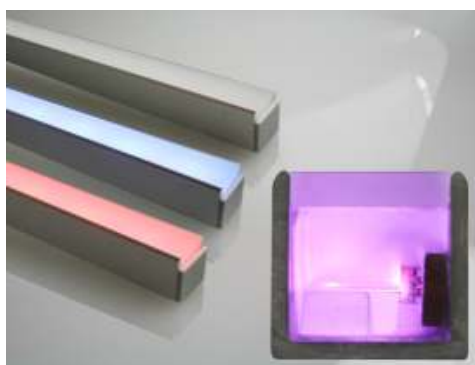

The mini profile with power LEDs consist of a u-shaped aluminium profile with a removable transparent acrylic glass cover.

The circuit board and LEDs are embedded in transparent artificial resin making the profile suitable for outdoor installation.

Maximum available length: 2,000 mm

Designation	Article no.
Power LED Mini Profile	5 5004 034

LED Mini Profile With RGB Illumination

LED spacing: 22 mm
Operating voltage: 12 volts DC, Power: 19.7 watts/metre

Description:

The mini profile with RGB illumination is very versatile. Multiple colours as well as a permanent dynamic/static colour change can be adjusted. This profile is also sealed in artificial resin and suitable for outdoor installation. The translucent cover can be removed.

Maximum available length: 2,000 mm

For dynamic colour control we recommend our RGB controller.

Designation	Article no.
RGB LED Mini Profile	5 5005 034
RGB Controller *)	6 0120 003

*) Up to 5 metres of profile can be operated with the RGB controller.
